

## 1957 MARKETING YEAR

TEXAS AGRICULTURAL EXPERIMENT STATION  
R. D. LEWIS, DIRECTOR, COLLEGE STATION, TEXAS

SALES, INCENTIVE PAYMENTS AND PRICES FOR TEXAS WOOL,  
1957 MARKETING YEAR

R. L. Holland and A. B. Wooten\*

The National Wool Act of 1954 provided for an incentive payment for wool and mohair from April 1, 1955 to March 31, 1959. The incentive price is established for each marketing year at such levels as the Secretary of Agriculture deems necessary to encourage an annual production consistent with the declared policy of the act. The incentive level was established at 62 cents per pound for shorn wool for the marketing years 1955-58. The marketing year runs from April 1 of one year through March 31 of the next year. This act has been extended for 3 years, 1959-61 with essentially the same provisions as the original act.

According to the estimates of wool production by the U. S. Department of Agriculture,, Texas produced 39,409,000 pounds of wool in 1957. Only 57 percent, or slightly more than half, of the wool produced was reported for incentive payments during the 1957 marketing year. The remaining 43 percent was not sold primarily because of an unfavorable market and was carried into the 1958 marketing year.

This summary was made on the basis of the 22,249,000 pounds that were reported by 14,630 producers in 1957.

The wool producer received an incentive payment on shorn wool for the 1957 marketing year equal to 15.5 percent of the total gross proceeds, less marketing deductions. No payment was made on mohair since the national average price received exceeded the incentive level of 70 cents per pound.

A deduction of 1 cent per pound, grease basis, was made from each producer's shorn wool payment. Five cents per hundredweight was deducted for lambs and yearlings sold for slaughter. These funds were used to conduct advertising and sales promotion programs on a national basis for wool, sheep and lambs and the products thereof. Texas producers contributed almost \$250,000 to the promotional program.

According to the applications filed in the 1957 marketing year with the Texas office of Agricultural Stabilization and Conservation in connection with the incentive payment program, 236 of the 254 Texas counties sold some wool under the program, as shown in the following county tabulations. Sales ranged from less than 100 to almost 2,000,000 pounds per county. Sales in two counties were more than 1,000,000 pounds each.

A total of 14,630 producers filed applications in 1957, an average of slightly more than 60 per county. The number of applications ranged from 1 to about 750 per county. The average number of pounds per producer was 1,520.

Texas wool growers received slightly less than \$2,000,000 through the incentive payment program on shorn wool for the 1957 marketing year. The net sales

---

\*Respectively, instructor and extension economist, Department of Agricultural Economics and Sociology.

on which incentive payments were made, (gross sales minus marketing costs), amounted to \$12,637,000. The two items totaled slightly more than \$14,000,000.

The average price received for wool in Texas in 1957 before incentive payments was 56.8 cents per pound; the incentive payment averaged 7.8 cents per pound, making a total of 64.6 cents per pound.

The average grease price before incentive payments was 43.2 and 45.6 cents per pound in 1955 and 1956, respectively. The corresponding prices including incentive payments were 61.6 and 62.8 cents per pound.

Wide variations in prices paid existed among Texas counties. In 1957, the lowest average price, including incentive payments, was near 30 cents per pound and the highest near 75 cents per pound. These variations exist for several reasons. The most important of these are differences in shrinkage, the quality of wool and the amount and type of vegetable matter present. The most important of the quality factors affecting prices are fineness and length of staple. Differences in price were also noted when sales were completed at different times of the year. The latter was a very important factor in 1957.

County	No. of growers	Total gross wool sales (pounds)	Average price received for wool (cents per pound)	Total incentive payments (dollars)	Total gross wool sales (pounds)	Average price received for wool (cents per pound)	Total incentive payments (dollars)
